

Pickers - MVC

CS112 Unit 14
Max Luttrell, Fall 2016

temperature conversion app

- We created an app which converts celsius to fahrenheit
- All of our code is in class ViewController

MVC refactoring

- can **refactor** the following out of our ViewController class:
 - unit conversion from C to F
 - temperature range, e.g. -50 C to 150 C
 - images for a given temperature

demo - temperature
conversion app refactoring

Exercise 14

- The app we built together can convert from -50 to 150 C, and starts at 0.
- It takes a long time to scroll through the picker. Change your picker so that it only displays temperatures that are a multiple of 5, e.g. -50, -45, -40, ...
